

CUSTOMER FEEDBACK

“SPIK SZMA” Company has been supplying Variable Speed Drives for our company since 2020. In this relatively short time, “SPIK SZMA” has proven to be a reliable supplier with below mentioned outstanding points:

First of all, “SPIK SZMA” has been carefully following up and implementing the design changes we requested due to extremely variable field conditions. This point demonstrates the expertise of technical staff and a decent base of technical resources.

Another point to mention is the high quality of customer support service: the technical support team is within a phone call’s reach and ready to support any time of the day to provide technical support;

“SPIK SZMA” also provided a comprehensive web-training on the features, and technical operation of components of the product.

Moreover, the products supplied by “SPIK SZMA” have good quality and proven to be rigid, tolerant, and exceeding expectations.

Overall, “SPIK SZMA” has proven to be adaptive to changes, quick to respond, and able to provide fair price with a competitive quality in the market.

Respectfully and gratefully,

Dovletgeldi Atabayev
